

PDC/PDCM Counterbalance Walkie Lift Truck

The Big Joe PDC/PDCM series represents the walkie lift truck version of the sit-down rider fork lift since they provide many of the same advantages at substantially less cost. Because of this, the counter balanced walkie is more cost effective when less duty-cycle is required.

The PDC Series

- 12 or 24 Volt System
- Open View Mast for Maximum Vision
- Safest Way of Handling Delicate Loads
- Slithers through 37" Wide Openings
- Compact Non-Straddle Chassis
- Adapts to Nearly Every Industry and Work Environment

Big Joe products are used by:

Trader Joe's, Vallarta Markets and Vons

The PDCM's 52" chassis length and four high pallet storage capabilities create dense storage.

The PDC is an excellent performer on and around loading docks and is compact enough to unload any delivery truck.

The counter balance stacker is hard pressed to find an application it can't handle. It is the "preferred weapon of choice"
