

Special Application Stackers

PDH - Power Driven Heavy Duty Stacker

The PDH is the heavyweight of the Walkie Stacker industry. This series is designed to perform over multi-shift operations and handles up to 4000 lbs at half the cost and weight of a rider truck. The 32" PDH chassis width allows the operator to handle heavy loads in narrow aisles and other congested areas. The PDH is built to order, making it perfect for those with special needs or requirements.

- Weight Capacities - 2000 to 4000 lbs
- 12/24 Volt Battery System
- Lifting Range - 5' to 16'
- Solid All Welded Frame

PDR - Power Driven Reach Truck

Efficient handling of heavy palletized loads requires dependable, high performance lift trucks. The big Joe PDR series of Walkie Reach Trucks was designed to fulfill these needs by combining the versatility of a counterbalanced forklift with the narrow aisle advantages of a straddle truck. Big Joe has been a leader in building Walkie Lift Trucks which deliver dependable, high performance at a lower cost.

- Lifting Capacity to 3,000 lbs
- 24 Volt Battery System
- Lift Range 106" - 194"
- Fork Tilt 3° Forward/6° Backward

SSCM Stock Selectors

The versatile Big Joe SSCM Stock Selector Series is designed and engineered for efficient order picking. To increase your profits, the Big Joe SSCM Stock Selector Series will maximize storage locations and handle your product safely and effectively. The SSCM enables you to maximize your order picking without tying up rider forklifts and allows the operator to become an efficient individual who can move faster, safer and wiser than employees on rolling ladders. The SSCM lets BIG JOE do the lifting for you.

SSCM 20-130

- 2000 lb. Capacity
